

Francis Ponnu Cruz I

Azure Cloud & DevOps Engineer

fcruz1301@icloud.com | 6379649461 | Coimbatore, Tamil Nadu | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven Azure Cloud and DevOps Engineer with over four years of experience designing, automating, and securing cloud infrastructure across Azure and hybrid environments. Proven expertise in Infrastructure as Code using Terraform, building robust CI/CD pipelines, and implementing cloud governance frameworks focused on reliability, scalability, and cost efficiency. Demonstrated ability to architect and deliver end-to-end cloud solutions, including an AI-powered resume analysis platform leveraging Azure OpenAI, Azure Functions, and Document Intelligence. Adept at cloud architecture, identity management, and enterprise-grade secure application design.

TECHNICAL SKILLS

Cloud Platforms: Microsoft Azure, Amazon Web Services (AWS)

Infrastructure as Code: Terraform, ARM Templates

DevOps & CI/CD: Azure DevOps, GitHub Actions

Programming & Scripting: PowerShell, Python

Serverless & PaaS: Azure Functions, Web Apps, Logic Apps

AI & Integration: Azure OpenAI, Azure Document Intelligence

Identity & Security: Microsoft Entra ID (Azure AD), RBAC, Azure Key Vault

Networking: Virtual Networks, NSG, Load Balancer, Application Gateway, WAF, ExpressRoute

Monitoring & Operations: Azure Monitor, Splunk, ServiceNow

Tools & Version Control: Azure Resource Graph, Git

PROFESSIONAL EXPERIENCE

Wipro | *Senior Project Engineer — Azure Administrator*

September 2021 – Present

- Managed cloud operations for enterprise workloads, handling critical incidents and conducting root cause analysis to drive measurable improvements in service reliability and uptime.
- Administered Microsoft Entra ID (Azure AD), including RBAC policies, service principals, and application registrations to enforce secure, least-privilege access across the organization.
- Designed and deployed Azure networking infrastructure including VNet peering, Network Security Groups, route tables, Application Gateway, and Web Application Firewall (WAF) to ensure secure, high-performance connectivity.
- Strengthened cloud security posture by leveraging Microsoft Defender for Cloud and implementing private endpoints, reducing exposure of critical resources to public networks.
- Maintained highly available infrastructure using Virtual Machine Scale Sets and Azure Web Apps, ensuring consistent performance and meeting defined SLA targets.
- Implemented comprehensive backup and disaster recovery strategies using Azure Site Recovery and Recovery Services Vault, minimizing data loss risk and recovery time objectives.
- Built and maintained CI/CD pipelines in Azure DevOps, enabling automated, repeatable deployments and significantly reducing manual release cycle time.
- Automated operational processes through Azure Functions, Logic Apps, and runbooks, improving team efficiency and reducing dependency on manual intervention.
- Produced architecture diagrams, runbooks, and technical documentation to accelerate onboarding and standardize incident handling procedures.

- Led cloud cost optimization initiatives through resource right-sizing, reserved capacity planning, and governance controls, achieving measurable reductions in cloud expenditure.

PROJECTS

AI-Powered Resume Analyzer | [Live App](#) | [GitHub](#)

- Designed and developed a full-stack, serverless application that evaluates resumes for ATS compatibility, identifies skill gaps, and delivers actionable improvement recommendations.
- Built the backend using Azure Functions (Python) with RESTful API integration, enabling scalable and event-driven processing of resume documents.
- Integrated Azure OpenAI for natural language processing to analyze resume content and generate context-aware evaluation results.
- Implemented document parsing with Azure Document Intelligence to support both PDF and DOCX file formats with high accuracy.
- Secured application secrets using Azure Key Vault with Managed Identity, ensuring zero credential exposure in the codebase.
- Developed the frontend using React with file upload capability and real-time analysis rendering for a smooth user experience.
- Deployed the full solution using Azure Static Web Apps and Azure Functions, making the platform publicly accessible with a serverless, cost-efficient architecture.

EDUCATION

M.Tech — Computing Systems and Infrastructure 2025

BITS Pilani

Bachelor of Computer Applications (BCA) 2021

KGCAS, Coimbatore

CERTIFICATIONS

- Microsoft Certified: Azure Solutions Architect Expert (AZ-305)
- Microsoft Certified: Azure Administrator Associate (AZ-104)
- Microsoft Certified: Azure Security Engineer Associate (AZ-500)
- Microsoft Certified: Azure Network Engineer Associate (AZ-700)
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Microsoft Certified: Azure Data Fundamentals (DP-900)
- AWS Certified: Cloud Practitioner (CLF-001)
